OCCUPATIONAL HEALTH, SAFETY AND ENVIRONMENT POLICY STATEMENT

POLICY OBJECTIVES

Integral to our operations within the Mechanical, Electrical, Instrumentation and Piping sector of the construction industry, is the fundamental importance of providing a safe and healthy working environment for our employees and to protect the environment. As such, our intent is to provide an internationally recognised HSE compliance framework within which we can achieve an exceptional record of zero harm to persons and to the environment in which we work.

POLICY STATEMENT

HSE is a key success factor to achieving our Vision and Mission and our desire is that our ability and commitment to achieving a high standard of HSE performance is known and is held in high regard by our stakeholders.

Management are aware of and are committed to their responsibility for the health, safety and welfare of employees and for the protection of the environment in which we work. Commitment to compliance with HSE legislation and regulations and fulfilment of international standards and stakeholder requirements, forms the framework of our HSE Management System and HSE culture.

Management, as employer representatives are committed to fulfil their legal responsibilities and to eliminate hazards and reduce HSE risks. Employees are consulted and participate in risk assessment, control, monitoring and review processes and improvement initiatives. Various communication and reporting forums are set up in order to facilitate worker and worker representative participation and to provide for feedback mechanisms throughout the hierarchical structure of the company and within individual projects.

Through employment of skilled resources and the provision of planned HSE awareness and competency training on health, safety and environmental issues, employees are in turn, expected to demonstrate willingness to comply with their HSE legal responsibilities and to uphold our objective of achieving zero harm to persons and the environment.

This policy outlines the top management's commitment to the effective implementation, monitoring and continual improvement of the HSE management system and the same commitment is required from all concerned if policy objectives are to be achieved.
